NUMERICAL TABLE OF CASES
REPORTED IN THE
AMERICAN DECISIONS, AMERICAN REPORTS
AND
AMERICAN STATE REPORTS
With References to Monographic Notes.

COMPILED AND VERIFIED
By GEORGE J. MARTIN.

SAN FRANCISCO:

1901.

PREFACE.

As librarian of the Law Library in which the American State Reports are edited, one of my most important duties is the verification of the proofs of that series. To facilitate my own labors, and to aid the gentlemen with whom I am an humble co-worker, these tables have been prepared and printed.

The names of parties are frequently so misspelled as to throw them out of their proper place in an alphabetic arrangement. A case which is miscited or misplaced in a table of cases is practically lost, except to those who make a business of verification. Furthermore, many of the reports, particularly the older ones, give blind citations, in which the number and page of the volume only are cited, without the names of parties. Cases so cited can be found in our series only through a numerical table, or by examination of the original reports. My own experience has proven that even when the names of parties are correctly given the location in the American Series can be more readily ascertained through this numerical table than through the alphabetic table of cases arranged under the names of parties. These tables also designate cases in the series having important notes appended, as indicated by the letter "n" affixed to the cases thus annotated.
